

## Lower Glidden Lake:

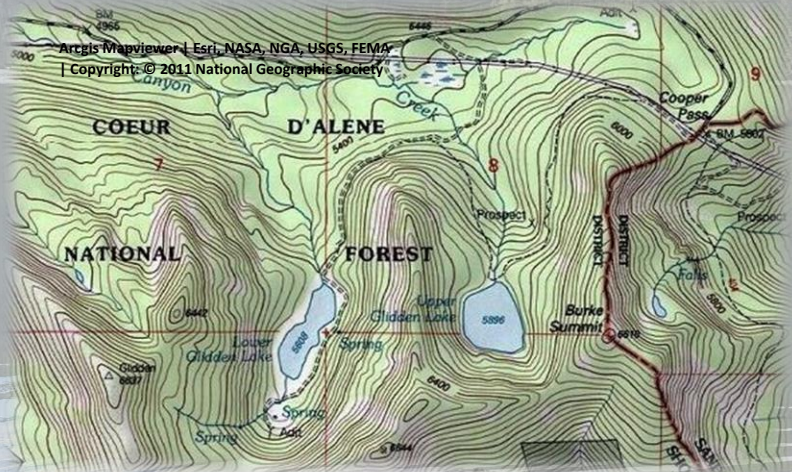

**Difficulty:** Drivable

**Distance:** 0 miles

**Trailhead Elevation:** 5615 feet; **Trailhead Lat/Long:** 47°31'5.57"N / 115°43'43.83"W

**Lake Elevation:** 5615 feet; **Lake Lat/Long:** 47°31'5.57"N / 115°43'43.83"W

**Getting There:** Head up past Burke towards Cooper Pass from Wallace, Idaho, stay on the main road #7623 on the right of the power station. There will be a road (#615) that angles off to the right about 3.25 miles from the substation. It is a little over a mile on road #615 to the lake. This road is very rough and rocky. Any pickup or SUV can navigate it, but I would not take a regular car that does not have much clearance.

**At the Lake:** This is a drivable lake that has good access for over halfway around the lake with numerous campsites. I do not know if there are any vault toilets, but from what I recall all the campsites are primitive. It seems to be a bit swampy in places and I would bring a boat or float of some kind. Electric motors are only allowed I do believe. I am not sure how the fishing is, but it does get stocked multiple times during the year and there is a significant amount of fishing pressure.
